

# CLIFFORD

*The Science of Security™*

## *IntelliVoice 4 Operation Instructions*

**C**ongratulations on your purchase of the Clifford IntelliVoice 4, a G4 system accessory. Your Clifford G4 vehicle security system is IntelliVoice 4 ready and will automatically provide the following human voice synthesis features.

### **Arming**

When you arm your Clifford G4 vehicle security system with its remote control, IntelliVoice 4 will announce “**ARMED**” instead of the usual siren double-chirp confirmation.

### **Disarming**

When you remotely disarm, IntelliVoice 4 will announce “**DISARMED**” instead of the usual single-chirp confirmation.

### **Full perimeter protection**

If someone brings his hands and face to the window to see what is inside your vehicle, a verbal warning will sound: “**ALARM WILL SOUND IF YOU DON'T BACK AWAY!**” If the person continues to linger near your vehicle, IntelliVoice 4 will issue a second warning: “**LAST WARNING! ALARM WILL SOUND IF YOU DON'T BACK AWAY!**”

### **Immediate alarm sounding**

If someone actually leans into the passenger compartment, the verbal warnings are bypassed and the full alarm sounds immediately.

### **Silencing voice acknowledgments and warnings**

You may use your G4 system's chirp muting feature to silence the “**ARMED**” and “**DISARMED**” announcements. The warning messages will not be effected.

If you wish to switch from the voice synthesis to your G4 system's standard siren chirps and sounds, you may do so using the remote control button combination noted in your G4 system's user's manual. IntelliVoice 4 will issue a door-bell-like acknowledgment when you do so. Repeating the remote control button combination restores IntelliVoice 4 to normal operation (confirmed with two door-bell-like chimes).

### **Automatic remote control low-battery warning**

If your remote control battery is low, you'll hear a low-pitched chirp when you disarm instead of the “**DISARMED**” acknowledgment. Replacement remote control batteries are available from any Authorized Clifford Dealer.

### **Chime upon remote arming**

If the door-bell-like chime sounds immediately after you arm, IntelliVoice 4 is warning you that the hood or trunk is open. If the chime sounds 5-10 seconds after the “**ARMED**” acknowledgment, a sensor is active.

### **Verbal diagnostic**

If you receive the chime upon arming, disarm, enter the vehicle and turn on the ignition. IntelliVoice 4 will verbally name the trigger or sensor that was active when you armed.

### **Chime upon remote disarming**

If the chime sounds after you disarm, IntelliVoice 4 is alerting you that there was an intrusion attempt made on your vehicle while you were away

### **Verbal identification**

If you receive the chime upon disarming, IntelliVoice 4 will verbally name the trigger or sensor that was tripped while you were away when you turn on the ignition.

### **About the Digital Dual-Zone Proximity Sensor 4**

The Digital Dual-Zone Proximity Sensor 4 is a radar sensor that detects movement both inside the passenger compartment and several inches to a foot outside the windows and soft-top (if you have a convertible). IntelliVoice 4 uses this sensor (whether it was standard on your particular G4 system or was added as an option) to detect such movement. The sensor's radar waves pass through nonmetallic materials like plastic, carpet, glass and wood. However, metal and metallic paint, plastic and even some metallic window tinting materials will interfere with or completely block the radar waves. As such, it is not unusual that the Proximity Sensor zones may need a little readjustment when you first have the system installed. In some instances, your Clifford installer may need to try a different location for the sensor.

If needed, you or your installing Clifford Dealer can adjust sensitivity of these sensor zones as noted in your owner's manual. To prevent falsing, system sensors are bypassed when the engine is remotely started (if you have the IntelliStart 4 option).

***Metal above or near the Proximity Sensor will have a significant impact on operation. You should not place coins, CDs, cassettes (due to the iron oxide tape) or other metallic objects above or near where the sensor is mounted.***

### **CliffNet Wizard software**

With the free CliffNet Wizard software and an optional #60-539 CliffNet Replicator, you can plug your Windows PC into your Clifford system to gain extensive feature control: you can select the language (English, Spanish, German or Dutch), set the volumes of the interior and exterior voice, alter the pitch of the chirps, and make other interactive adjustments. See [www.clifford.com/wizard](http://www.clifford.com/wizard) for details.

### **Limited factory warranty terms & conditions**

Clifford vehicle security systems and accessories require professional installation by an Authorized Clifford Dealer. Unless the system is sold and installed by an Authorized Clifford Dealer, all product warranties and guarantees are void. (UK: This does not affect your statutory rights.) As the manufacturer, Clifford Electronics warrants to the original consumer purchaser, the system control unit to be free from defects in material and workmanship for one (1) year from the date of purchase. Clifford Electronics will repair or replace, at its option and free of charge during the warranty period, any system component that proves defective in material or workmanship under normal installation, use, and service, provided the product is returned to our factory by an Authorized Clifford Dealer, transportation charges prepaid. Products returned to our factory must be accompanied by a photocopy of the purchase receipt. In the absence of such purchase receipt, the warranty period shall be one (1) year from the date of manufacture. Any damage to the product(s) as a result of misuse, abuse, neglect, accident, incorrect wiring, improper installation, destruction or alteration of the serial number, repair or alteration outside our factory, or any use violative of instructions furnished by us will void the warranty. This warranty is limited to defective parts and specifically excludes any incidental or consequential damages connected therewith. This warranty is not transferable. Clifford Electronics makes no warranty against theft. This warranty is not to be construed as an insurance policy against loss. Warranty on installation labor, removal and reinstallation charges are not the responsibility of Clifford Electronics, Inc.
